English

BALOGUN MOYINOLUWA UMAR

Full-Stack Developer

React | JavaScript | Firebase | Python | APIs | Responsive Web Applications

PROFILE

Full-Stack Developer with practical experience building responsive web applications, interactive interfaces and backend-connected digital products. Skilled in React, JavaScript, Firebase/Firestore, API integration and Python, with experience across portfolio websites, business websites, ecommerce concepts, dashboards and educational tools.

EXPERIENCE

Software Development & Data Analysis Intern — 2025

HNG Internship 13 | Remote

- Completed structured software development and data analysis learning tasks, with assessment activities up to Stage 5.
- Strengthened technical discipline, analytical thinking, communication and task delivery through staged internship work.

Industrial Training — 2025 - 2026

Jimzan Concepts | Sango, Ogun State

- Built web applications and interactive features while gaining practical development experience.
- Worked with HTML, CSS, JavaScript, React and Firebase while improving UI/UX, debugging and problem-solving skills.

Freelance / Personal Projects — 2022 - Present

Self-Initiated | Remote

- Developed multiple websites including Unify Studios, Gadget Store and personal portfolio projects.
- Implemented responsive designs, authentication flows, API integrations and dynamic frontend features.

SELECTED PROJECTS

- **Full-Stack Portfolio V2**
  Premium developer portfolio built with React, Vite, Lucide icons and a custom black/mint visual identity.
- **Classical Mechanics Simulator**
  Interactive learning platform for visualising physics concepts using React, Python and FastAPI.
- **Real Estate / Rental Platform**
  Property listing concept with responsive browsing flow, listing pages and backend-connected structure.
- **Business & Ecommerce Websites**
  Responsive client-style websites including salon, restaurant, gadget store and service landing pages.
